

### Signal beacons

Signal beacons are fundamental elements for visual and audible signalling of system status in manufacturing processes.

- Bases for various mounting solutions are supplied separately

### Signal towers Ø70 mm

Signal towers can be assembled by stacking up to seven modules of:

1. Up to 7 light modules (steady or blinking) less one if a sound module is required
2. Add connection module for terminating
3. Add mounting accessories if required

- Light modules: steady light / blinking light
- Sound modules: continuous or pulsed sound
